REMARKS

Entry is proper for the following reasons:

(1) The Applicants and the Examiner disagree on whether the pending claims distinguish over the applied references, but, if the dumbbell-shaped hole were added to it then claim 1 would recite a feature which is not seen in the applied references. The case would then become allowable, so entry is proper.

(2) The applied art is already the closest applicable art, so no additional searching should be needed if the single limitation of dumbbell-shaped is added.

Respectfully submitted,
